## FluoroType<sup>®</sup> SARS-CoV-2 *varID Q*

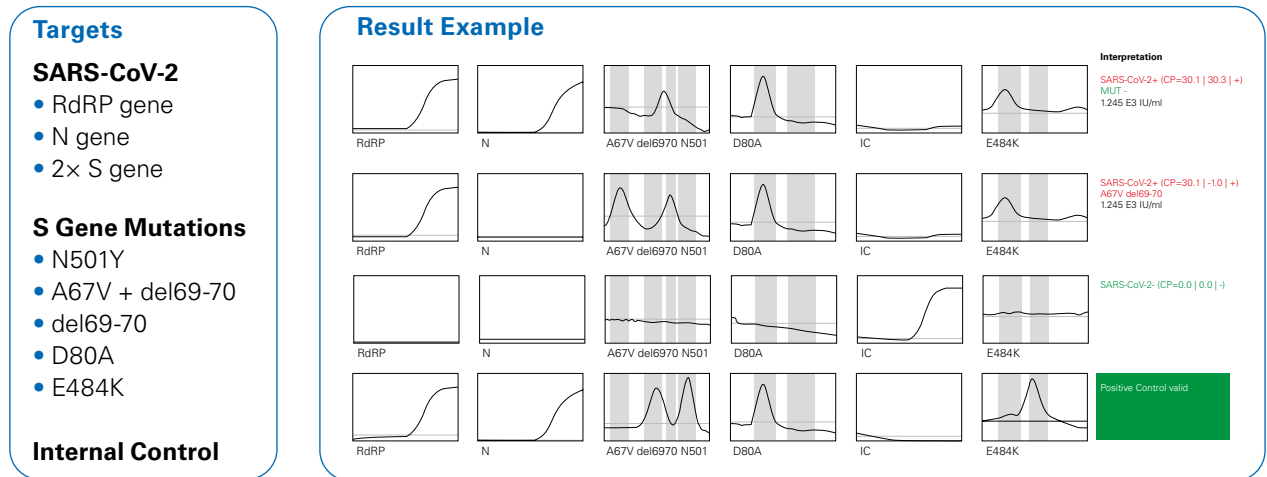

- Multiplex PCR for quantitative detection of SARS-CoV-2 and differentiation of relevant SARS-CoV-2 mutations

### Keep track of SARS-CoV-2 variants

- Differentiation of relevant SARS-CoV-2 mutations
- Quantitative detection of SARS-CoV-2
- Directly from oro- and nasopharyngeal swabs
- PCR results in less than two hours
- High test capacity

## FluoroType® SARS-CoV-2 varID Q

SARS-CoV-2 continues to challenge healthcare systems worldwide with the emergence of novel variants of SARS-CoV-2. FluoroType® SARS-CoV-2 varID Q allows rapid differentiation of relevant SARS-CoV-2 mutations and helps to track their spread. Furthermore, the assay enables quantitative viral load assessment of the patient sample. With the automated analysis on FluoroCycler® XT this assay is a reliable solution for high capacity testing providing PCR results in less than two hours.

### Results at a glance

Automated multiplex real-time RT PCR and melting curve analysis on FluoroCycler® XT in combination with the fully automated test analysis gives the result at a glance, easy to use, easy to interpret.

The FluoroType® SARS-CoV-2 varID Q kit is combined with an encapsulated RNA Internal Control (Universal Internal Control 2), which mimics lysis of viral particles and serves as an extraction, reverse transcription and amplification control.

- Viral load assessment according to NIBSC First WHO International Standard for SARS-CoV-2 RNA
- Identify SARS-CoV-2 variants of interest\* according to their underlying mutations
- 4-target SARS-CoV-2 detection
